

Corporate Governance

Honor the truth, a new challenge

Continue to challenge the prior field constantly and create new functions while observing conventional technology.

And we will carry out the responsibility "to continue to be a member contributing to the evolution of society and science".

Corporate Philosophy

Creation of Multifunctional Membranes

We will manufacture multifunctional films such as "adhesion and gas barrier properties, thermoplastic and thermosetting, electrical conductivity, heat conduction, heat dissipation and water activity" with the coating as the axis.

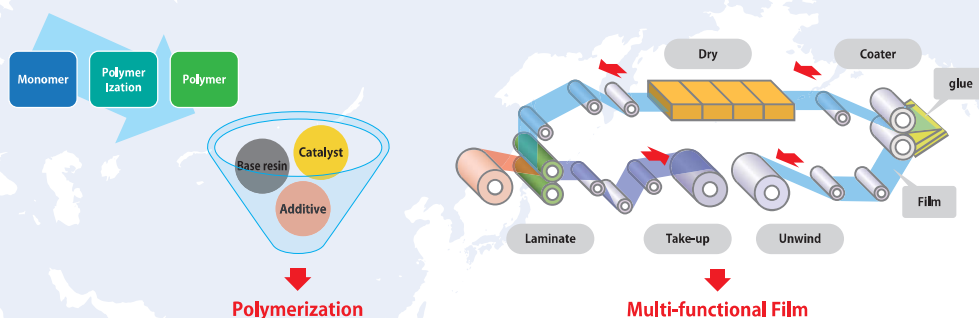

Corporate Profile

- | | |
|--|---|
| ■ Company Name : KGK Chemical Corporation. | ■ Employees : 80 |
| ■ Established : Oct/30/1979 | ■ Capital : 50 million yen |
| ■ Head Office : | ■ Business contents : |
| 940 Minaminagai, Tokorozawa, Saitama, 359-0011 Japan | 1. Manufacture of multifunctional |
| ■ Chairman & CEO : Shokichi Hamano | 2. film, Manufacture of viscous adhesive tape |
| ■ President : Hisashi Hamano | 3. Punching materials such as plastic film |

Our Business

MULTI-FUNCTIONAL TECHNOLOGY COMPANY

We Solve Customer's Problems With Multifunctional Technology.

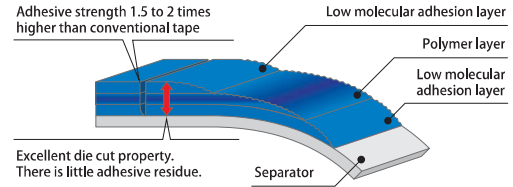

KGK started in 1979 as adhesive tape manufacturing and adhesion processing industry. We have continued manufacturing and research and development with household electrical insulation, automobile interior use, building materials, electronic equipment, medical use, others. Today we are trying to establish fundamental technologies to create polymeric materials with advanced functions based on monomer polymerization, polymer design and multifunctionalization technology and to lower manufacturing cost. Based on that technology we will make social mission to build a comfortable environment for public safety, health and welfare.

Product

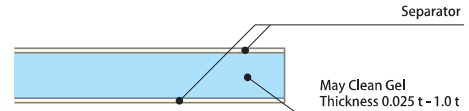

Molecule Gradient Tape

Excellent adhesive strength of 1.5 - 2.0 times compared to conventional double-sided tape.

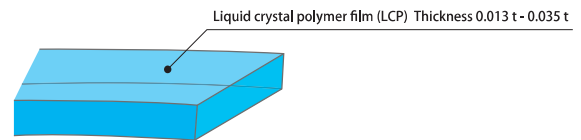

May Clean GEL

Acrylic based GEL substrate is resilient, solvent resistant and has excellent weather resistance and cushion function.

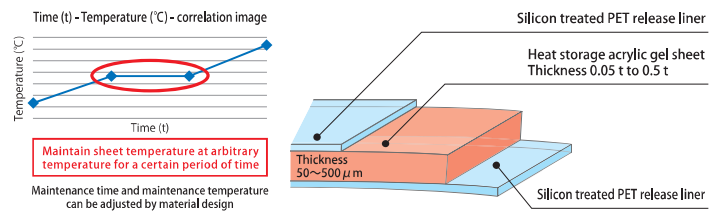

LCP Film 「SARAS」

Excellent electrical, energy characteristics in high frequency region. Excellent Flame retardancy & chemical resistance.

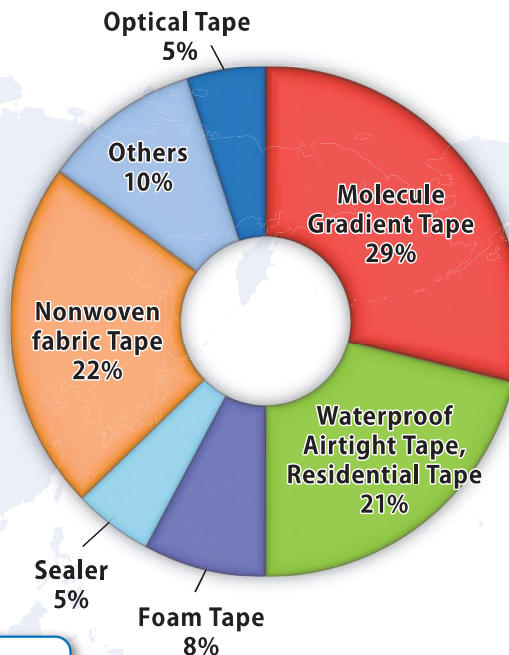

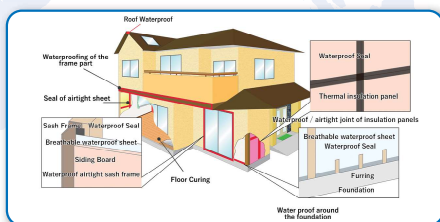

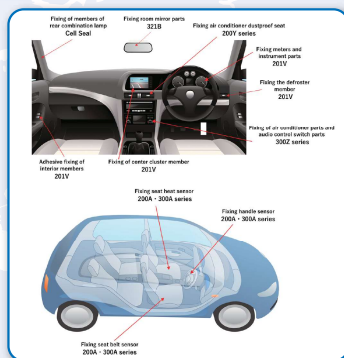

Heat Storage 「FREY」

Heat storage adhesive sheet.

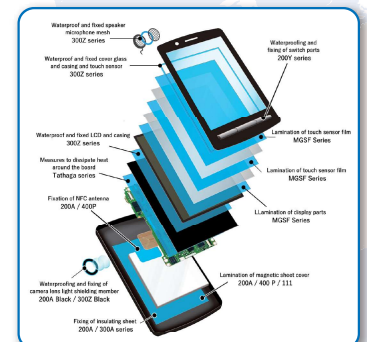

Market
